

DNode-EZ

The Power of DNode with the Learning Curve of NowJS (5mins)

DNode-EZ is

DNode

.....Inverted

It's All About the ~~Benjamins~~

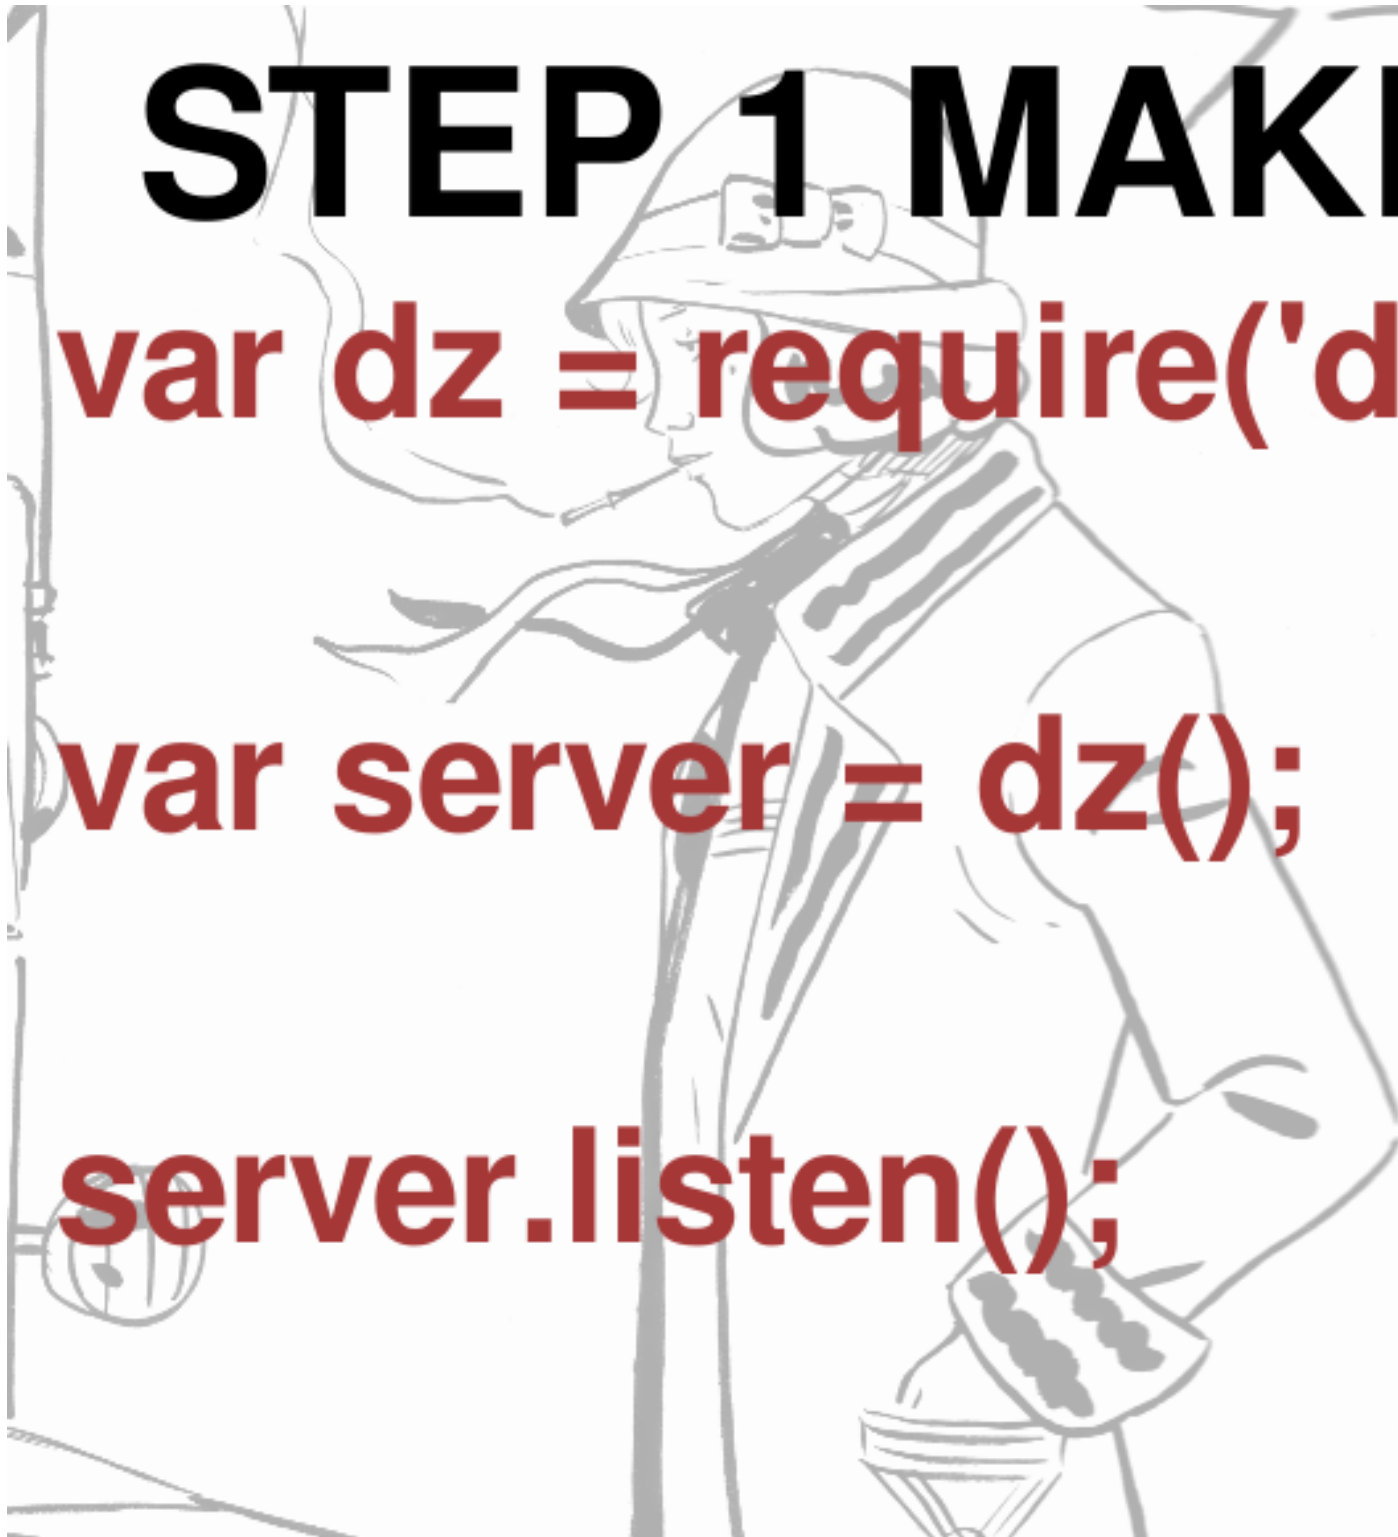

Use Case

STEP 1 MAKE IT

```
var dz = require('dnode-ez')
```

```
var server = dz();
```

```
server.listen();
```

STEP 2 BAKE IT

```
var emitter = new EventEmitter;  
emitter.on('foo', function(x) {  
    alert(x);  
});  
var client = dz();  
client.bind('foo', emitter);
```

STEP 3 PROFIT

```
server.emit('foo', "BAM!");
```

**Client gets "foo" emitted on its
own emitter with argument
"BAM!"**

Emitter at point A

***Emitter Needs to
be squeezed
across
the wire***

Turn This

***Emitter on
the client***

Into This

***Squeezed
by the Hand
of the Server***
